

BRAND GUIDELINES

BRAND GUIDELINES FOR CORPORATE IDENTITY OF THE RESTAURANT IKRA

IMPLEMENTATION OF THE CORPORATE IDENTITY
JANUARY 28, 2022

IKRA

BRAND GUIDELINES

SECTION 01

LOGOTYPE

These guidelines are a detailed description of the corporate identity and a set of rules for its use. They describe all the features of the logotype – its size, the proportion of various elements, color palette and placement recommendations. Design of the logotype and the corporate

identity of the brand is an important part of the entire brand creation.

PRINTFILES/LOGO

BRAND GUIDELINES

SECTION 02

LOGOTYPE

The Ikra logotype is the key element of the corporate identity. It is a combination of text components and a graphic component. The logotype consists of a symbol and a unique graphic lettering of the slogan.

PRINTFILES/LOGO

Main version of the logotype

Additional version of the logotype

Logotype without the descriptor

Text version of the logotype

Monochrome versions of the logotype

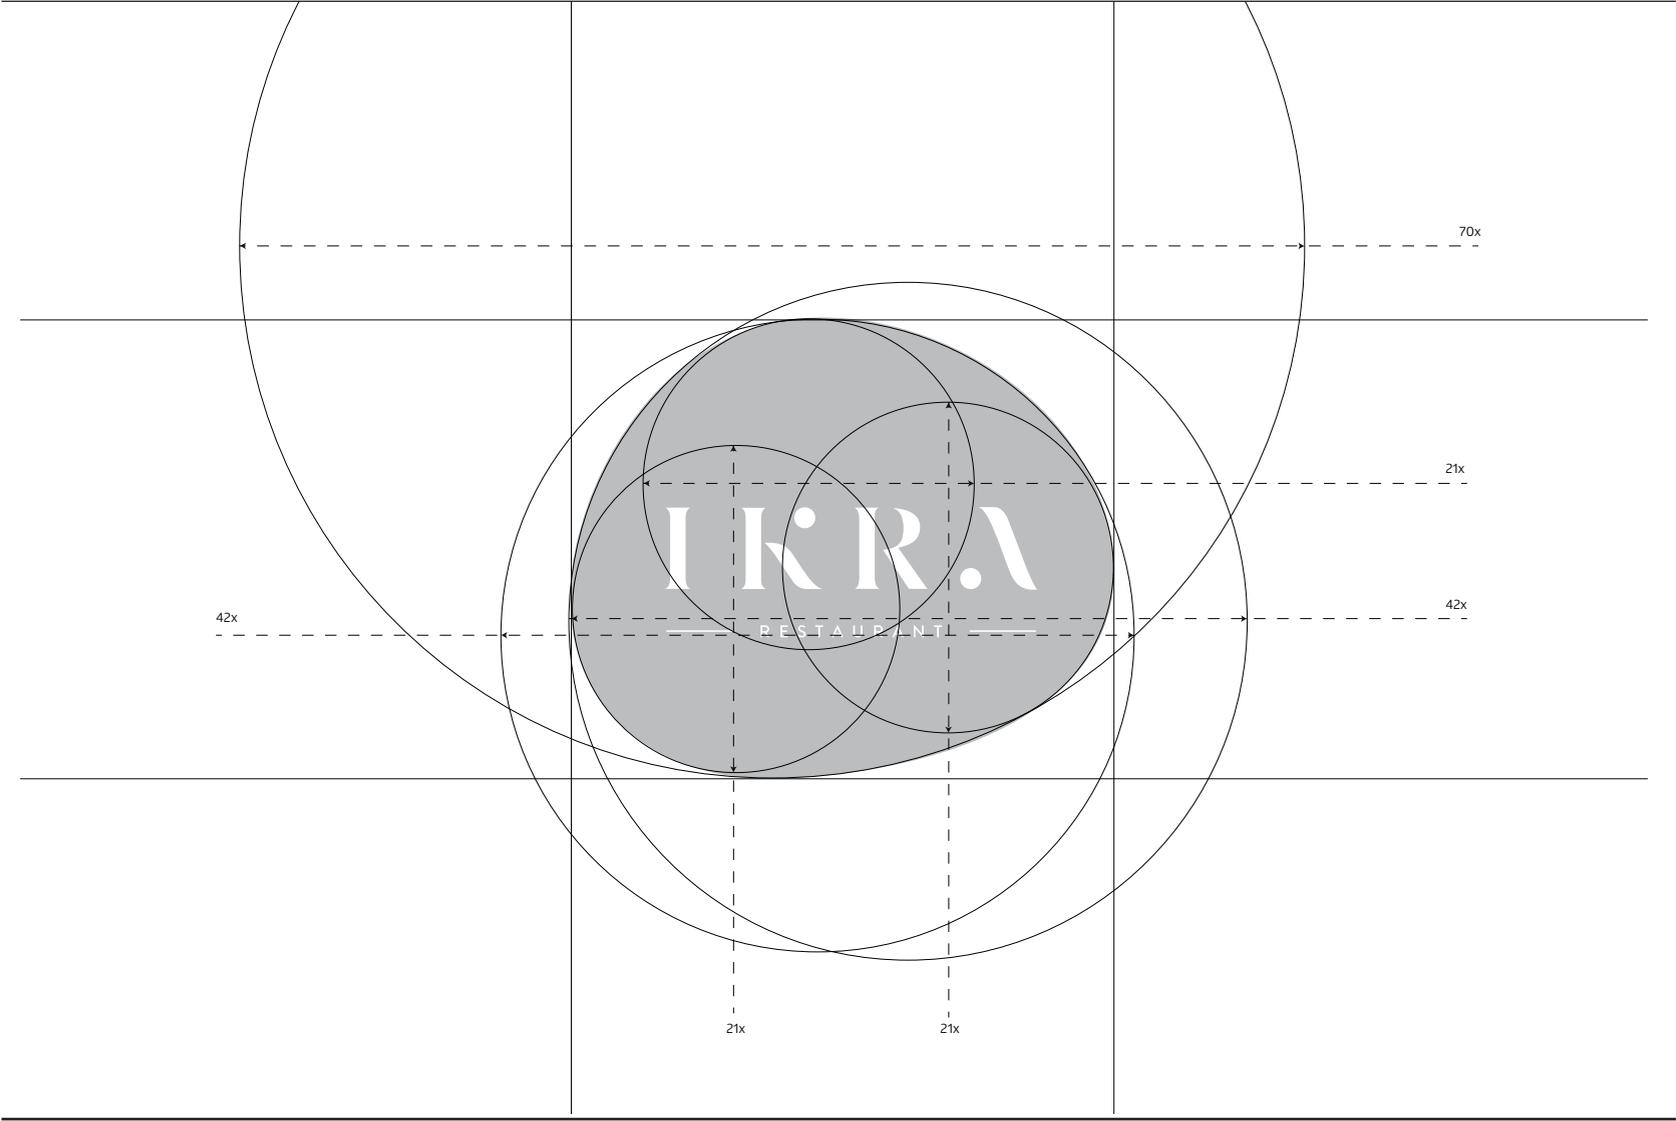

BRAND GUIDELINES

SECTION 03

LOGOTYPE

The graphic part of the logotype is a set of circles of different diameters. The logotype reflects the essence of the company name. A caviar is illustrated as an irregular copper-colored circle.

PRINTFILES/LOGO

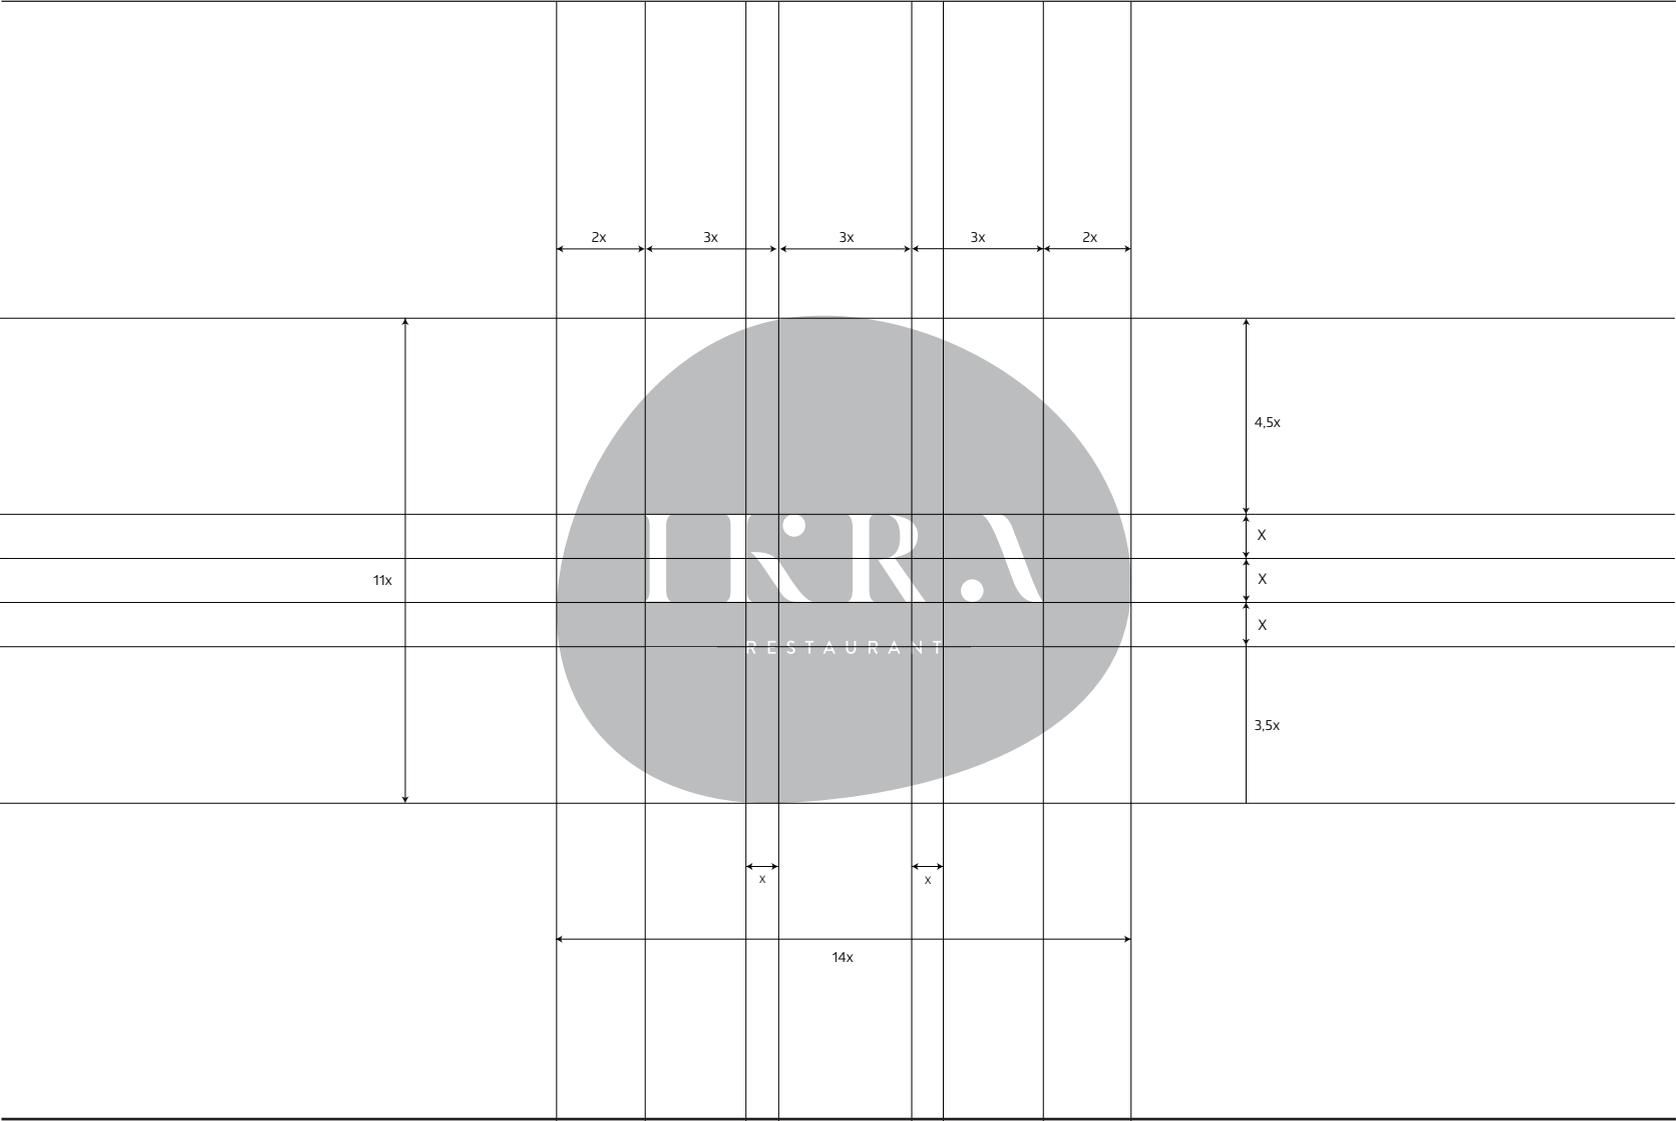

BRAND GUIDELINES

SECTION 04

LOGOTYPE

The logotype is designed in accordance with the graphic standards and proportions.

PRINTFILES/LOGO

BRAND GUIDELINES

SECTION 05

LOGOTYPE SIZES

The developer recommends strictly observing the maximum and minimum size of the logotype with and without the descriptor. It is recommended to print the logotype with a vector texture, if the logotype is no larger than 300 mm in diameter. If the diameter of the logotype exceeds 300 mm, the text version or the main version of the logotype shall be used.

300

maximum size

65

40

minimum size with the descriptor

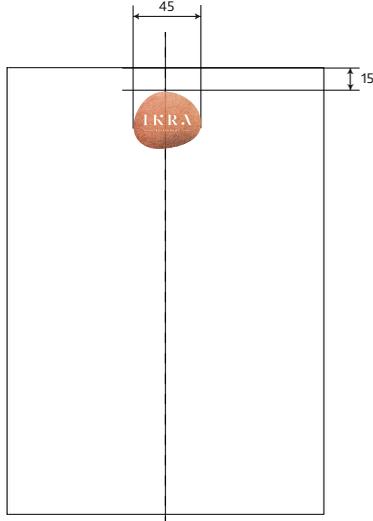

20

minimum size without the descriptor

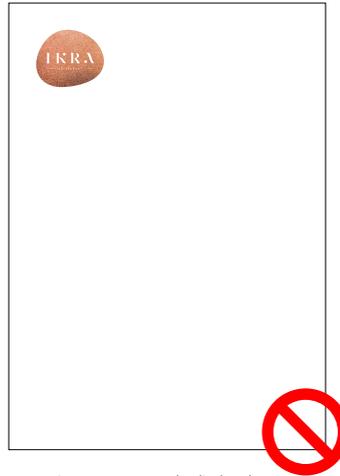

SECTION 06

LOGOTYPE PLACEMENT

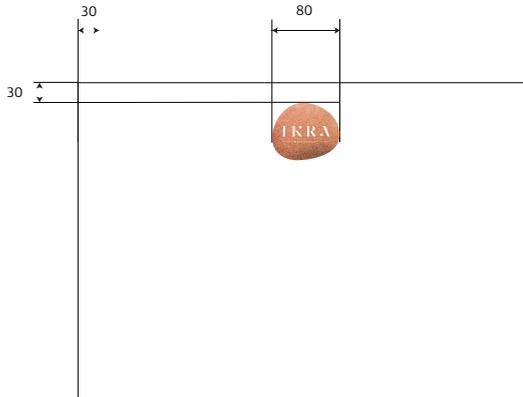

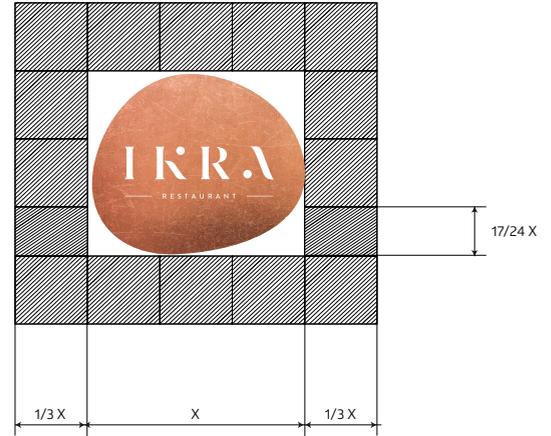

To ensure the logotype recognition and clear perception, always try to leave empty spaces (indents) around the logotype. No graphic elements, photos or text elements must be located within the white space of the logotype. Please take into account that the free margin changes in proportion to the logotype size. The indents around the logotype must be at least half of the area of the logotype. The logotype on media, not indicated in these guidelines, is recommended to be placed in the center. Corner placement shall be excluded.

Placement of the logotype on A4 paper

Logotype must not be displaced

Placement of the logotype on A3 paper

Paper size	Logotype size
A4 – 297 mm X 210 mm	45 mm
A4 – 210 mm X 297 mm	35 mm
1/2 A4 – 210 mm X 148 mm	30 mm
A3 – 420 mm X 297 mm	80 mm

BRAND GUIDELINES

SECTION 07

LOGOTYPE PLACEMENT

The logotype can only be placed on a single-color light or dark background. The priority colors are white, black or other dark contrasting colors. It is forbidden to place the logotype on a background that merges with it. The background around the logotype must not be colorful. The logotype must not be used as a pattern (except for a display strip), as

well as rotated by any angle. The logotype must not be framed and no additional elements must be added. The color of the inversion in the logotype must not be changed and the colors other than corporate ones must not be used.

Placement of the logotype at an angle is not allowed

Use of shadows is not allowed

Changing the position of the text part on the symbol is not allowed

Use of the logotype on non-contrasting background or backgrounds containing the color of the symbol is not allowed

Any deformation of the logotype is not allowed

Placement of the logotype in close proximity next to other logotypes is not allowed

BRAND GUIDELINES

SECTION 08

Recommendations for the use of color and monochrome versions of the logotype.

BRAND GUIDELINES

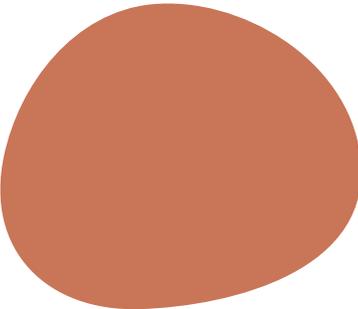

SECTION 09

CORPORATE COLORS

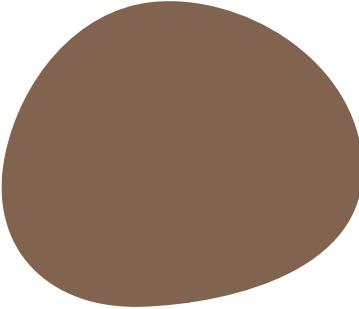

As corporate colors, it is recommended to use:

- the provided corporate texture (see section Corporate elements);
 - pantone, metallic;
 - metallic foil (<https://www.univacco.com>);
 - corporate colors CMYK, RGB, HTML.
-

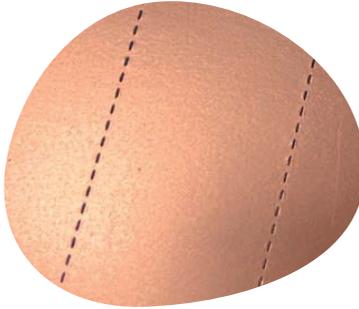

RGB: 204 116 82
CMYK: 17 61 68 5
HTML: C77557

Pantone:
PMS 875 C (Metallic)

Foil:
Univacco MG76

SECTION 10

CORPORATE FONTS

The main corporate font is the Corsa Grotesk font family. These fonts shall be used as the main fonts when developing design layouts for any product of the company. The Darker Grotesquer front family shall be used as the main font for web media. This font may be used as a secondary font when developing layouts for printed products and POS materials.

BRAND GUIDELINES

SECTION 11 CORPORATE ELEMENTS

As a corporate element we use the corporate texture. The developer has provided vector and raster (HR) files.
PRINTFILES/TEXTURE

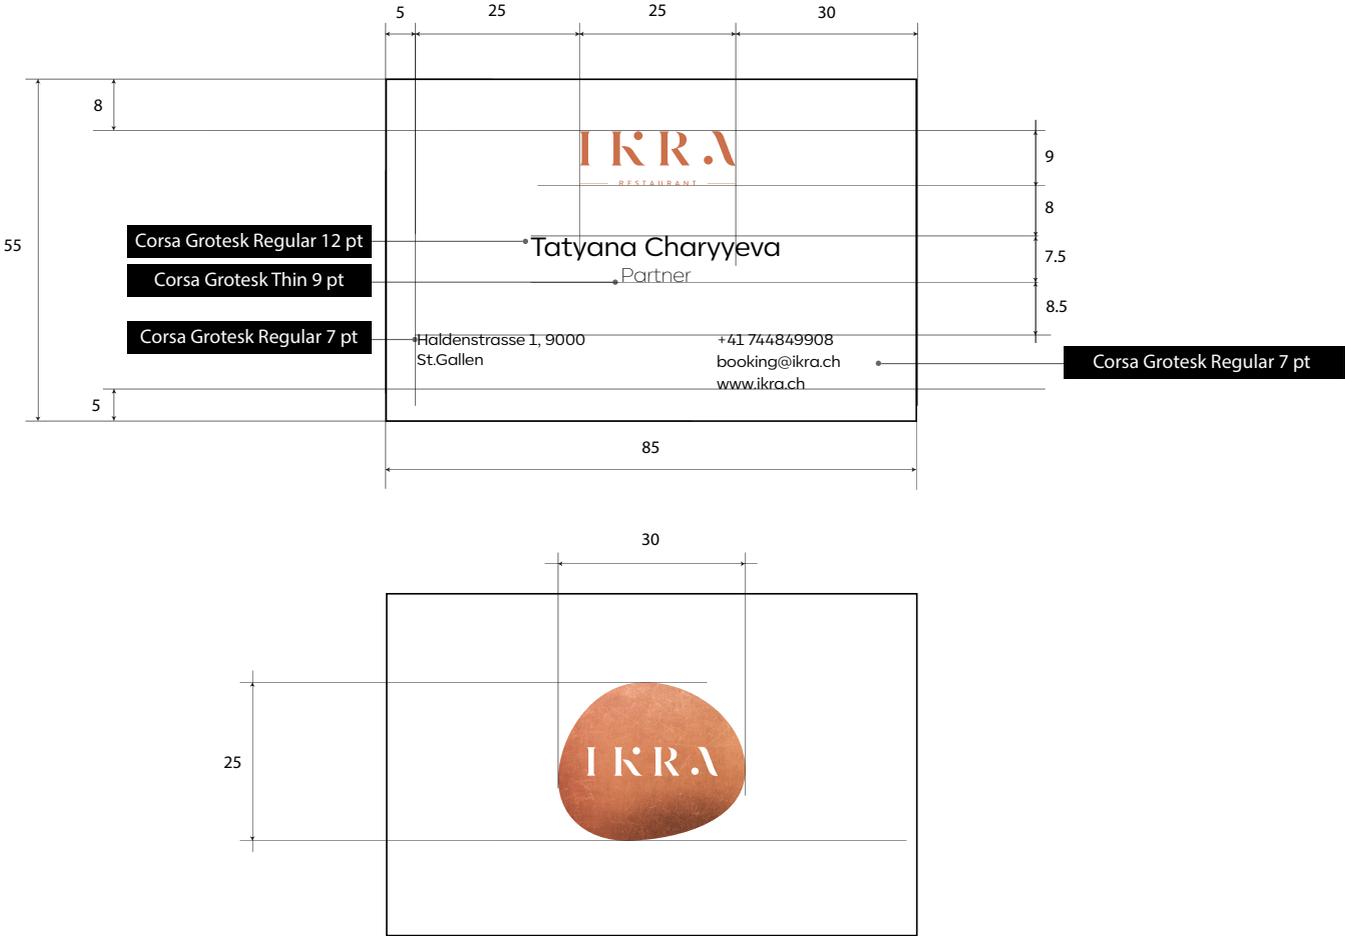

BRAND GUIDELINES

SECTION 12

BUSINESS CARD

Recommended – 300 g paper (coated paper), CMYK or foil or Pantone 2+1 printing.

PRINTFILES/BUSSINES CARD

BRAND GUIDELINES

SECTION 13 LETTERHEAD

For all advertising and information materials, a single modular grid is used, ensuring achievement of recognition and ease of handling documents. The main blocks of information materials are: address block, logotype, header, text block. The developed grid allows to create and use multi-page documents. For the purpose of user-friendliness, duplication of the document title is provided on all pages. Recommended – 100 g paper, CMYK or Pantone 1-0 printing.
